

U-M Medical School Office of Enabling Technologies,
Center for Computational Medicine and Biology (CCMB),
and Department of Internal Medicine

Present

The Inaugural
Health Informatics Grand Rounds

Don E. Detmer, M.D., M.A.
President & CEO,
American Medical Informatics Association

**“Current Issues in
Improving Clinical
Performance through
Informatics:
A Policy Perspective”**

Friday, November 3, 2006
12:00 noon - 1:00 p.m.
Ford Auditorium, University Hospital
(The week's Internal Medicine Grand Rounds)

This lecture will give an overview of the current domains of informatics and the impact informatics is expected to play in research, education, practice, and policy.

The Health Informatics Grand Rounds is a lecture series established by the U-M Medical School to raise awareness and engage the community in current and future directions in information and communications technology in research, teaching, learning, clinical care, and service.
